SemperFix OMP Bring-Up Card — Version 1.0

Windows 11 Pro · PowerShell 7 · Oh-My-Posh · JetBrainsMono Nerd Font

Status: STABLE · Multi-Machine Ready · Repo-Backed

1. Purpose

This bring-up card defines the deterministic, drift-free installation workflow for Oh-My-Posh (OMP) across all SemperFix machines:

- MASTERZERO
- SECONDARY
- OFFSITE

The workflow eliminates:

- Microsoft Store shadowing
- WindowsApps symlink conflicts
- winget variability
- theme path drift
- font inconsistencies

This process is designed to be repo-backed, offline-safe, and repeatable.

2. Required Files (From Repo)

Code

</> Python

```
1 SemperFix-OMP-Bringup/
2 |
3 |— bin/
4 |   |— oh-my-posh.exe
5 |
6 |— themes/
7 |   |— paradox.omp.json
8 |
9 |— fonts/
10 |   |— JetBrainsMonoNerdFont-Regular.ttf
11 |   |— JetBrainsMonoNerdFont-Bold.ttf
12 |   |— JetBrainsMonoNerdFontMono-Regular.ttf
13 |
14 |— installer/
15 |   |— install_semperfix_omp.ps1
16 |
17 |— docs/
18 |   |— SemperFix-OMP-Bringup-Card.pdf
19
```

All machines must use the same binary, fonts, theme, and installer script.

3. Font Standardization and Delugia Deprecation

3.1 Delugia Removal

The Delugia Nerd Font family was removed from the Nerd Fonts project during the v3.0 cleanup due to:

- Cascadia Code packaging/licensing changes
- Redundant patching pipelines
- JetBrainsMono NF becoming the recommended terminal font

- Upstream maintenance consolidation
- Repository size reduction

Delugia is no longer available or maintained.

3.2 Replacement Font

The SemperFix OMP Bring-Up Kit standardizes on:

JetBrainsMono Nerd Font

Reasons:

- Actively maintained
- Full Nerd Font glyph coverage
- Clean terminal rendering
- Consistent behavior across Windows Terminal
- Future-proof compatibility with Oh-My-Posh
- Stable multi-machine deployment

4. Installation Workflow (Operator Steps)

4.1 Clone the Repo

powershell

</> PowerShell

```
1 git clone https://github.com/SemperFix/SemperFix-OMP-Bringup
2 cd SemperFix-OMP-Bringup\installer
3
```

4.2 Run the Installer Script

powershell

</> PowerShell

```
1 .\install_semperfix_omp.ps1
2
```

The installer performs:

1. Removal of Microsoft Store remnants
2. Renaming of WindowsApps symlinks
3. Creation of the OMP directory
4. Installation of the repo's known-good binary
5. Installation of the repo's theme pack
6. Installation of JetBrainsMono Nerd Font
7. PATH precedence correction
8. PowerShell profile update
9. Application of the SemperFix Standard Theme (Paradox base)

4.3 Restart Windows Terminal

This loads:

- JetBrainsMono NF
- PowerShell profile changes
- OMP initialization
- Paradox theme

5. Verification Steps

5.1 Verify OMP Resolution

powershell

</> PowerShell

```
1 Get-Command oh-my-posh
2
```

Expected:

Code

</> PowerShell

```
1 C:\Users\<User>\AppData\Local\Programs\oh-my-posh\oh-my-posh.exe
2
```

5.2 Verify OMP Functionality

powershell

</> PowerShell

```
1 oh-my-posh --version
2 Get-PoshThemes
3
```

5.3 Expected Prompt Behavior

- Paradox theme active
- Glyphs rendered correctly
- No "CONFIG NOT FOUND"
- No WindowsApps shadowing

6. SemperFix Standard Theme (Paradox Base)

The theme included in:

Code

</> PowerShell

```
1 themes/paradox.omp.json
2
```

is a tuned Paradox variant with:

- Clean glyphs
- Stable segments
- SemperFix color palette
- JetBrainsMono NF alignment

The installer script applies this theme automatically.

7. Multi-Machine Bring-Up Notes

7.1 MASTERZERO

- Install OMP using this card
- Validate fonts and theme
- Freeze Golden Template after verification

7.2 SECONDARY

- Clone repo
- Run installer
- Validate prompt
- Validate WSL + Hyper-V integration

7.3 OFFSITE

- Clone repo

- Run installer
- Validate remote sync and failover paths
- Ensure identical operator experience

8. Operator Verification Checklist

- PowerShell 7 launches cleanly
- Windows Terminal uses JetBrainsMono NF
- OMP resolves from Programs directory
- Paradox theme loads
- Glyphs render correctly
- No WindowsApps shadowing
- No Store remnants
- PATH precedence correct
- Profile block present
- Repo files installed correctly

9. Versioning Notes (v1.0)

This bring-up card is **SemperFix OMP Bring-Up v1.0**, tied to:

- JetBrainsMono Nerd Font
- Paradox theme
- Manual OMP binary installation
- Repo-backed provisioning
- Windows Terminal + PowerShell 7 baseline

Future versions may include:

- SemperFix Standard Theme v1.1
- Additional segments (WSL, Hyper-V, Git status)
- Logging and verification in installer script
- Automatic OMP version updates

- Multi-machine sync automation
